

Teachers and Students – Looking for a Field Trip Idea?

Do You Know What's In Your Water?

Teachers and students – would you like to know more about water, and the science and technology of water filtration? Do you know what is in your water, and how it can affect your health? Do you know why drinking water is so important for your body?

If you are interested in answering these questions, and would like to learn more about water, water contaminants, and water filtration, schedule a field trip to visit Multipure! Tour our offices, meet our scientists and executives, and learn about the water filtration industry and how it works to provide you with better water and better health.

If you would like this information without leaving the school grounds, contact us to schedule a visit from Multipure to your school and classroom, where we will teach you about water, science, and healthy living.

Multipure can teach you about:

- The importance of water for healthier living.
- Water quality and the dangers of water contamination.
- The science and technology of water filtration.
- The actions you can take to improve your water and the environment.

For additional information, please contact Donna Robinson by phone at 800.622.9206 or by email at drobinson@multipure.com.

About the Pure Foundation

Multipure's vision has always been to provide the opportunity for better health for people and their families. Through the Pure Foundation, Multipure aims to improve lives through education and assistance – to make a positive difference toward the health and happiness of children, adults, and families everywhere. By teaching people of all ages, and by exposing them to the issues of clean drinking water, the Pure Foundation aims to improve people's health and improve the environment.

If you would like to learn more about Multipure and the Pure Foundation, please visit our website at <http://www.multipure.com/pure-foundation.html>, or contact us by phone at 800.622.9206.
