

# Aquasplash

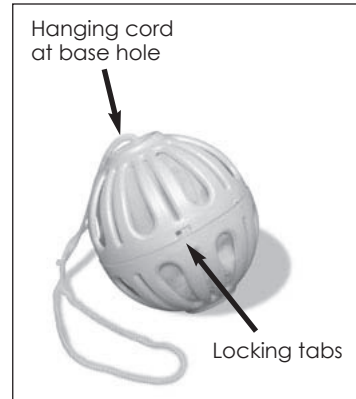

## Replacement Bag Instructions

Please follow these instructions carefully.

Suggested replacement: 200 baths or one year which ever comes first

### First Step: Remove the old media bag

1. Locate the four locking tabs molded into the Aquasplash.
2. Place your thumb just above one of the locking tabs and press down lightly and turn each half in an opposite direction. The two halves will then separate.
3. Now remove the old media pouch by carefully pulling the hanging cord through the hole in the base. You may have to give a gentle tug on the cord to pull the plastic tie through the hole.

### Second Step: Placing the new media pouch in the Aquasplash

1. Thread the hanging cord through the base hole and pull it through. If needed, give a gentle tug to pull the plastic cord tie through the hole.

### Third Step: Closing the Aquasplash

1. The Aquasplash uses an improved locking system. It will provide a firmer closure by using four modified locking tabs.
2. Each half of the body has two locking tabs. Align one of the tabs with the inside groove on the opposite half of the body. This should align the other three tabs with its matching groove.
3. Now turn the half in your right hand towards you slightly. This will lock the tabs into position.
